Renova Energy Featured on 2020 Top Solar Contractors List

Solar Power World declares Renova Energy an industry leader

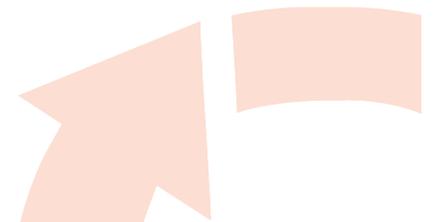

PALM DESERT, CA, JULY 23, 2020 – [Solar Power World](#) has recognized solar contractors in its [2020 Top Solar Contractors list](#), where local solar installer Renova Energy holds strong numbers. In California, Renova Energy stands at #8 for rooftop installations and #11 in battery storage out of more than 2,300 solar companies. Despite the impacts of COVID-19, Renova Energy continues to recognize the urgency of mitigating climate change and safely driving the economy toward a greener future.

"The *Solar Power World* team is so pleased to highlight more than 400 companies on the 2020 Top Solar Contractors list, especially during this unprecedented time," said Kelsey Misbrener, Senior Editor of *Solar Power World*. "All contractors featured on the 2020 list reported strong 2019 installation numbers and are continuing to stand tall this year."

Featured on the [2020 Top Solar + Storage Installers list](#), Renova Energy ranked at #4 in California and #31 in the United States for solar and storage installation volume. As a Certified Installer with Tesla Powerwall operating from one location in a state with the highest solar and battery storage demand, Renova Energy has captured an overwhelming market share and is on track to top the list.

Companies in the Top Solar Contractors face obstacles that this industry has never seen before. The first quarter of 2020 was the biggest ever, with 3.6 GW of new solar capacity added in the United States. COVID-19 impacts showed their force in Q2, and Wood Mackenzie is forecasting residential and non-residential markets will see 25% and 38% decreases in installation volumes this year. Renova Energy is taking every precaution and offering virtual consultations while earning record solar sales.

"Renova is proud to help so many families and businesses switch to solar and start saving money, as well as help the environment," said Renova Founder/CEO Vincent Battaglia. "Self-

sufficiency is becoming increasingly important, so the fact that we can also design and install customized microgrids through Mycrogrid by Renova Energy makes a big difference.”

In business since 2006, Renova Energy’s employee-partner base has grown into one of the most successful employee-owned solar companies on *Solar Power World’s* 2020 Top Solar Contractors list. The success of their ESOP program is attributed to the employee-partners propelling the business forward every year.

About Solar Power World

Solar Power World is the leading online and print resource for news and information regarding solar installation, development, and technology. Since 2011, SPW has helped U.S. solar contractors — including installers, developers and EPCs in all markets — grow their businesses and do their jobs better.

About Renova Energy

Employee-owned, award-winning Renova Energy was founded in 2006 by Vincent Battaglia, MBA and now boasts nearly 175 employee-partners, a fleet of 85 vehicles and a three-building campus encompassing more than 40,000 Sq. Ft. Multiple national awards including SunPower’s Residential National Dealer of the Year, National Top Producer, National Customer Service Award and National Commercial Intelegant Design Award (out of their approximately 450 dealers nationwide). Renova was also the first company in the nation to be accredited by the North American Board of Energy Practitioners (NABCEP) and remains one of only 11 in the nation.
