## **Renova Energy Wins SunPower 2019 “National Intelegant” Award for Commercial Solar Installation as well as “Residential Regional Top Producer of the Year” Award**

**PALM DESERT, CA, March 11, 2020** – Renova Energy, a Palm Desert-based solar installer, has received the SunPower “National Intelegant” award for an exceptionally well-designed and installed commercial solar project commissioned in 2019. The 2,100 kW award-winning rooftop system is producing clean energy from the new flagship Destination Porsche location in Palm Springs, CA.

“Renova Energy has demonstrated superior craftsmanship with the sleek design and installation of this SunPower system, featuring premium solar panels that are unmatched in performance, reliability and aesthetics,” said Norm Taffe, SunPower executive vice president, North America. “We congratulate Renova Energy for their extraordinary delivery of such an elegant commercial solar project and look forward to their continued success as a SunPower dealer in 2020.”

“Renova Energy is honored to receive the 2019 ‘National Intellegant’ award from SunPower,” said Founder/CEO Vincent Battaglia of Renova Energy “SunPower’s innovative commercial solar

solutions combined with Renova Energy’s reputation for high-quality work and customer service will help ensure that Porsche Palm Springs’s solar energy system delivers economic and environmental benefits for the next 25 years or more.”

“After comparing all proposals and designs, we found that Renova Energy offered the best fit for our company,” said Todd Blue, Founder and CEO of indigo Auto Group, owner of Porsche Palm Springs. “Combining the area’s most experienced and trusted installer with the world’s best panel proved to be the right solution. We’re thrilled to work with the premier local solar company, Renova Energy, and excited to be incorporating clean, renewable energy into our dealership of the future.”

The rooftop solar system made of 576 SunPower 360-watt panels will serve as an important demonstration of Porsche’s prototype for future locations. Porsche Palm Springs is located on a 2.7-acre lot on Highway 111 at 3737 East Palm Canyon Drive. The LEED-certified building is thoughtfully designed to retail and service the new Taycan, Porsche’s first all-electric vehicle, which was recently released. Powered with solar energy, the new facility has fast charging portals where future Taycan owners can charge 62 miles of range in just four minutes.

Renova Energy has also received the SunPower “Residential Regional Top Producer of the Year” award for its outstanding sales performance as a SunPower dealer in 2019.

“It’s a great honor to be named SunPower’s 2019 ‘Residential Regional Top Producer of the Year,’ recognized for our unmatched success offering high quality, complete solar solutions to homeowners in and near the Coachella Valley” said Founder/CEO Vincent Battaglia of Renova

Energy. “SunPower is an innovative partner that enables us to deliver reliable solar energy and predictable electricity savings to customers over the life of their solar systems.”

SunPower awarded Renova Energy during its remote dealer conference for having the highest shipment volume the previous year, compared to other best-in-class partners in their region of the United States.

“Renova Energy is a strong contributor within our national dealer network, providing localized sales, quality installations and outstanding customer experiences, which aided in the company’s exceptional 2019 performance,” said Norm Taffe, SunPower executive vice president, North America. “We look forward to Renova Energy’s continued success as a SunPower dealer, helping more homeowners realize the rewarding benefits of solar.”
